

CAMHS Neurodevelopmental Team (NDT)

What we do

We work closely together with schools to make sure that we provide the best care to you and your child.

Each specialist school meets every half term with the senior clinicians from the NDT. All schools are also able to request ad hoc consultation as and when needed.

The outcomes to these consultation slots may be:

- A family accessing one of the NDT's online interventions.

These include taught sessions on relevant subjects such as '**Re-thinking Autism**', '**Re-thinking behaviour**', '**Non-Violent Resistance (NVR)**' which is a therapeutic approach that can help you reflect on your parenting strategies/ styles and sensory issues. This list of online interventions is always being developed in line with need.

- Consultation slot

You may be invited to a **consultation slot** to discuss your child's needs in more detail with NDT clinicians which we would hope would result in you receiving some specific advice, guidance and strategies to support your child.

- NDT Episode of care

Or You may be allocated to CAMHS for a specific episode of care.

If you have a particular worry or concern and think that you would benefit from your child being discussed in these meetings, please speak to your child's schools' family worker or class teacher who can request this for you. We will need your signed consent and agreement before we would be able to take this request forward.

If you ever need help or support for your child in an emergency, please contact 01234 893300 to speak to CAMHS directly. Please contact 111 option 2 for out of hours support.
